

ALD 2016 Ireland

Massimo Tallarida
Beamline Scientist
ALBA Synchrotron, Spain

Massimo Tallarida obtained a PhD degree in physics in 2005 from the Freie Universität in Berlin (Germany), with a thesis carried on at the Fritz Haber Institut, Berlin.

In 2005 he joined the Brandenburgische Technische Universität (BTU) in Cottbus (Germany), in the group of Prof. Schmeisser. In 2007 he started the first experiments on ALD processes and materials using synchrotron light at the BESSY-II facility, by means of photoemission and X-ray absorption spectroscopy.

In 2015 he moved to the ALBA Synchrotron, near Barcelona, in Spain, where he is in charge of constructing a new UV/Soft X-ray beamline to perform ARPES experiments.
